Local taxes – 1 EUR per day

SUMMER SCHOOL FOR STUDENTS ZOONOSES

22nd April – 29th April 2019

Dubrovnik - Croatia

Social programme

Lokrum

The eternally green islet of romantic beauty, positioned right off the coast of Dubrovnik is a true oasis of peace, and one of the most attractive excursion sights for residents of Dubrovnik and its visitors. With its maintained bathing sites and bays, view of the sunny open sea, extensive pine woods, lush subtropical vegetation, and with its old Benedictine monastery and walking trails along the shaded alleys, the islet gives an unforgettable impression.

In the bosom of the fragrant park is the former Benedictine monastery (from the 12th century), closed down during Napoleon's occupation. Later, the monastery and the islet as a whole came into possession of the Habsburg Archduke Maximilian and became his summer residence in 1859. Maximilian renovated the monastery in the neo-Gothic style and built a castle in the shape of a tower. Following Maximilian's tragic death in Mexico, the islet changed hands several times, and today is a protected nature park.

During the French occupation, the French erected a citadel called "Fort Royal" at the highest point on the island, which is a lookout point today, offering the loveliest view of Lokrum and the whole of Dubrovnik.

A special attraction on Lokrum is its small lake, called the "dead sea". The castle today is home to the Biological Institute of the Croatian Academy of Arts and Sciences and the Natural Sciences Museum, with its valuable collections and memorial collection of world renowned Dubrovnik mathematician, atomist and astronomer Ruđer Bošković (18th century). Transport to Lokrum is organized via tourist boats from the Dubrovnik old town port.
